Prepared for any performance **1**

5 LCD panel and graphics user interface

6 Needle Search

Auto 4-Beat Loop/ Loop cutter **3**

7 Jog Dial

USB MIDI MP3 disc DVD ROM

FEATURES

1 Prepared For Any Performance

Adapting to today's variety of media formats, the CDJ-2000 enables playback of MP3, AAC, WAV and AIFF audio files from CDs and USB memory devices, and from DVDs and SD cards as well on the CDJ-2000. A USB port located on top of the turntable enables users to quickly connect an external storage device such as a Tonium Pacemaker™ or a hard drive packed with music files, minimizing the need to bring a laptop computer to performances.

The CDJ-2000 turntable includes rekordbox™, Pioneer's proprietary music management software that organizes and catalogs a DJ's entire music library. When music files are imported to rekordbox, the software analyzes each file and prepares them for use specifically with the CDJ turntable.

Included Music Management Software rekordbox
Manages music files and supports and easy DJ life.

2 Pro DJ Link

Pioneer's Pro DJ Link enables up to four CDJ-2000/900s to be connected via the Link Port to share a single music source, whether it is a hard drive, USB and/or SD memory card. Once linked, users have the ability to quickly find, display and choose the music file from a connected source through the CDJ's built-in display and control knobs. A quick turn of the knob lets users scroll through created files and folders and a push of the knob confirms the song choice.

3 Auto 4-Beat Loop/Loop Cutter

Creates an automatic 4-beat loop when you press the "4-Beat Loop" button. Each subsequent push of the button cuts the loop in half. Or hold the "Loop Out" button and press the "4-Beat Loop" button to double the loop length.

4 Advanced Connectivity

The turntable features a 24-bit/48 kHz sound card and HID and MIDI control compatibility via USB port. Up to 35 controls on the surface of the player can be used to trigger other devices, such as DJ effectors and software by way of HID and/or MIDI. The HID controls were implemented into the player for superior interfacing with software, faster communication speed over MIDI, audio/visual streaming and two-way information on the display. HID enables easy, precise and native control of DVS systems such as Serato™ Scratch Live, Native Instruments' Traktor series and MixVibes Cross2 without the need for time-coded discs.

5 LCD panel and graphics user interface

The flagship CDJ-2000 features a large WQVGA 6.1-inch full-color 480 x 234 LCD panel for displaying song titles and jacket art as well as detailed track information so DJs can select songs at a glance. The wave data of each song is also illustrated on screen, showing high and low amplitude to further assist DJs.

6 Needle Search

Helps DJs instantaneously get to a specific part of a song with a simple touch of the Needle Search pad. Found directly below the CDJ-2000's high resolution LCD panel, the touchpad lets the DJ "place the needle" and jump quickly to a specific part of a music track.

7 Jog Dial

Adjustments for tension were enhanced from previous models allowing the DJ to further customize the feel of the jog dial from a light to heavy sensitivity. Four illuminated areas on the sides of the Jog Dial aid the DJ in finding the desired spot on the plate in dim lighting environments.
